Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Petition

This Office Action is in response to Technology Center Director's decision to withdraw the allowance, thereby, in response applicant's amendment filed on August 11, 2003. Claims 11, 14, 17, 19, and 20 have been amended. Claims 1-10 and 31-36 are newly discovered claims. Claims 37-41 are newly added claims.

Claim Objections

Claim 11 is objected to because the last limitation recites, "at least one sensing element supported on the tissue coagulation body proximal to the inflatable tissue coagulation body" appears contradictory since it states the sensing element is supported on the coagulation body and the proximal to the coagulation body. It appears the sensing element should be supported on the elongated body proximal to the coagulation body.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3743

Claims 11-30 and 37-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Swanson et al (U.S. Patent No. 6,076,012). Swanson et al discloses a catheter assembly comprising an elongated, flexible support structure having an axis. The assembly also includes an elongated porous electrode assembly carried by the support structure along the axis for contact with tissue. The elongated porous electrode assembly comprises a wall having an exterior peripherally surrounding an interior area, a lumen to convey a medium contains ions into the interior area, and an element coupling the medium within the interior area to a source of electrical energy. Figure 1-3 illustrating a probe (10) that includes a structure (20) carrying multiple electrode elements (28), a catheter tube (12) carried by a sheath (26) and the catheter tube (12) with a distal end (14) and a proximal end (16). Figure 3A illustrating the structure (20) carrying at least two temperature sensing elements (540) and they can comprise a thermistors or thermocouples.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
